Student Trial Exams in Mexico

A group of students from [CICS UMA National Polytechnic Institute](#) in Mexico took the Student Trial Exam (2 December 2020).

On 17 December 2020, the IACLE Americas Regional Office held virtual meetings with **Marcela Tapia**, Head of School at Centro [Interdisciplinario de Ciencias de la Salud Unidad Santo Tomás](#) in Mexico, and **Marcela Lopez** from [FES Iztacala](#), Mexico, to discuss contact lens education in Puebla. They came to the conclusion that Mexican optometry schools would integrate the Student Trial Exam as part of the strategy to improve and strengthen contact lens education in Mexico.

In 2020, more than 50 IACLE members from the LA region took part in the radio program to discuss various contact lens topics, thanks to the sponsorship of www.franjavisualradio.com. In total, more than 60 hours of content was recorded and over 6,000 ECPs tuned into the shows across Zoom, Facebook live and YouTube. This year, we will be discussing new topics and incorporating evidence-based information.

We appreciate the active support and participation of our members and we invite new members to join us every Wednesday to speak about contact lenses.

A special thanks to Grupo Franja for sponsoring the program.

We hope to see you soon, and as we say at the end of each episode, see you next week for another contact lens Wednesday!
